

TalaTek Logging Services

Comprehensive Deployment and Configuration Services

TalaTek's Log Management offers two flexible levels of logging services. Both options give you complete visibility into your environment. You can rely on TalaTek in partnership with BlackMesh and LogLogic to provide a secure, adaptive solution that can adjust to your growing logging needs.

Our service provides you with various dashboards, compliance-specific logging suites, real-time alerts and customized reports—making it easy to keep your finger on the pulse of your business. Our solution is a must for managing business risks and ensuring security controls remain in place for audit and compliance requirements.

We will work with you through the entire process from setting up your logging environment to creating customized alerts and meaningful reports. It's our goal to take the complexity out of compliance and make logging simple.

Now Logging the Cloud

- Security management services for access control, system use, access monitoring and incident response for SaaS, PaaS, IaaS cloud environments
- Allow you to report on metrics and key controls required by regulations for internal and external audit
- Tools to prove PCI, FISMA, HIPPA compliance along with other select mandates
- Greater visibility of application activities, such as Virtual Machine change monitoring (creation, copy, move, deletion, start, stop, suspend, configuration change, etc.)

KEY FEATURES

- Cost-effective solution to assist your organization in addressing its applicable compliance requirements
- Provides secure gathering, transmission and storage of all log data with up to 365 days of data available online and 12 months of data available in off-site archives
- Robust reporting interface contains many standardized reports, many tailored to specific standards, with customized reporting available to meet your unique requirements
- Leverages market-leading LogLogic® logging technology

In Partnership with BlackMesh

BlackMesh provides IT services to small- and mid-sized businesses, specializing in the design, deployment and administration of robust, innovative managed hosting and managed services. BlackMesh provides these services both on-premise and within carrier-neutral Equinix data centers with 24x7 support.

Peace of Mind Made Affordable

TalaTek provides you with the flexibility and control you need to not only know if you are compliant, but answers the questions, “Is our network performing at optimum level? Has our data been tampered with or modified?”

TalaTek’s Managed Logging and Auditing Service is a cost-effective solution that assists your organization in addressing compliance requirements. We provide a secure collection and storage of your applications and underlying infrastructure log data with up to 365 days of data available online and unlimited off-site data storage. Our logging solution contains many standardized, real-time alerts that are tailored to specific standards with customized reporting available to meet your unique requirements. Please contact us for pricing.
